Excellent API design, implementation and integration abilities paired with significant project leadership background. Exceptional success in delivering complex software development projects on time and within budget to exceed expectations.

Experience

SuprDaily By Swiggy - Senior Software Engineer

Bangalore, India

04/2022 - Current

11PM PICKING

- Lead the Product End To End i.e. from gathering product requirement, documented changes to delegate work among other team member
- As a part of 11PM picking we have completely change the way we handle the Customer Order at warehouse that help us to reduce the manpower, improve customer experience etc.
- Met with stakeholders, product teams and customers throughout system development lifecycle.

Packaging Suggestions

- As a part of Packaging Suggestions we had introduced the suggestion of packaging Material for packing of Customer Order Items
- Designed a system in such a way so that it can easily extensible for future changes
- Create/Run script to generate the packaging suggestion data before rolling out the feature on Production for better suggestion and adherence

Deliver Fresh

- As a part of **Deliver Fresh** Project we want to make sure that customer experience should be good with respect to the freshness of product
- Go through all the domains and figure out what are all the places we need to make changes
- Divide the project into milestones and delegate work among other team member
- Suggest the product design to reduce the cost of procurement of new assets
